Experience

Full Stack Web Developer | IT Manager

September 2024 – October 2025

Marsos SA (Ayn Al Manal for Business Services)

Riyadh, KSA

- Led full-stack development of the Marsos platform using Next.js, Tailwind, and Supabase, delivering secure, scalable, and well-structured multi-role system features.
- Managed IT operations including network stability, workstation setup, system monitoring, and internal technical workflows for all departments.
- Built authentication, dashboards, booking workflows, messaging features, and reusable components to enhance user experience and system reliability.
- Optimized performance through API tuning, caching strategies, database indexing, and front-end refinements for faster platform loading times.
- Coordinated IT procurement, vendor relations, access control, device configuration, and maintenance of software tools used across the company.
- Provided technical support and troubleshooting, resolving network issues, login errors, device failures, and system conflicts to maintain high uptime.

Web Developer | IT Specialist

December 2023 - August 2024

Surfactants Detergent Company (SDC)

Jubail, KSA

- Developed the SDC company website using Vite, JavaScript, and Tailwind, delivering a modern, responsive, and optimized digital presence.
- Configured hosting, DNS, email, and SSL via cPanel to ensure fast, secure, and stable website performance across regions.
- Enhanced UI/UX, implemented SEO best practices, and structured multilingual content for improved ranking and user clarity.
- Provided IT support including network troubleshooting, system updates, and equipment maintenance to sustain daily operations.

- Installed and configured office devices, routers, switches, software tools, and shared resources to optimize workflow.
- Performed system monitoring, technical documentation, and basic cybersecurity to protect infrastructure and data.

Freelance Web Developer (Part Time - WordPress & Code Based)

September 2018 - Present

Self Employed

International, Remote

- Built custom WordPress sites using Elementor, WooCommerce, and PHP edits, ensuring mobile-ready, SEO-optimized, and scalable websites.
- Fixed critical issues including contact form errors, SMTP misconfigurations, plugin conflicts, broken layouts, and website downtime.
- Repaired WooCommerce checkout failures by debugging JS conflicts, gateway errors, caching issues, and permalink problems.
- Conducted website migrations, cPanel setups, DNS/SSL configuration, and hosting optimization for improved stability and security.
- Implemented SEO improvements via Yoast, schema fixes, metadata cleanup, and media optimization to boost search ranking.
- Supported marketing by building landing pages, integrating Mailchimp, optimizing funnels, and setting up analytics tracking.

IT Specialist

September 2018 - December 2023

Glitter Ice for Contracting Co.

Riyadh, KSA

- Maintained IT infrastructure and ensured 99% uptime by managing servers, networks, hardware, and software systems.
- Supported 100+ users by troubleshooting device issues, applications, and network connectivity, reducing downtime significantly.
- Implemented cybersecurity procedures, backups, permissions, and recovery protocols to secure data and maintain compliance.
- Configured routers, switches, printers, and enterprise tools for smooth cross-department workflows and efficient operations.
- Automated IT processes to reduce manual workload and increase troubleshooting accuracy across departments.
- Managed procurement, installation, and licensing of IT devices to ensure resource availability and system readiness.

IT Administrator

December 2012 - September 2018

Babel Maintenance, Operation & Trading Co.

Riyadh, KSA

- Handled full IT operations including server management, network configuration, and secure access control.
- Performed regular system upgrades, firewall tuning, monitoring, and preventive maintenance for stable performance.
- Managed data backups, IT documentation, asset inventory, and user administration for structured system management.
- Coordinated with vendors for hardware/software maintenance and procurement of company-wide IT resources.
- Trained staff on cybersecurity, safe system usage, and IT best practices to reduce human-related technical issues.
- Created network diagrams, procedures, and documentation to streamline troubleshooting and future upgrades.

Education

Diploma in Computer Studies, System Technology Institute (STI) | Santa Maria, Bulacan
